

Public Notice

City of Petersburg Public Water System PWSID #130148

RESCISSION (CLOSURE) OF BOIL WATER NOTICE

City of Petersburg Public Water System is no longer on a boil water notice.

The Department of Environmental Conservation (DEC) has formally rescinded the boil water notice issued on February 14, 2013. This notice was originally issued due to a routine water sample testing positive for E. Coli.

The water system has been sampled and the samples have been analyzed by a certified laboratory for total coliform bacteria and E. Coli. All 4 samples collected on February 14, 2013 have been determined to be satisfactory (no total coliform bacteria or E. Coli were detected).

The effective date of the boil water notice rescission is February 15, 2013. For more information regarding the closure of the boil water notice, please contact Jamie Bjorkman with DEC at (907) 262-3423.
