

**Public Notice for Petersburg
Public Water System (PWSID #130148)**

BOIL WATER NOTICE

The Alaska Department of Environmental Conservation (DEC) Drinking Water Program has issued this public health advisory for all users of the Petersburg public water system.

All water from this public water system that is used for drinking, cooking or other potable purpose should be **boiled for 2 minutes** prior to use

This Boil Water Notice is being required due to a routine bacteria water sample testing positive for E. Coli.

Boiling the water for 2 minutes will help ensure that the water is adequately treated until this contamination incident is further evaluated and the water is determined to be safe to drink.

For more information, please contact the City of Petersburg at (907)772-4760 or the DEC office at (907) 262-3423.
